Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kinoshita et al (6752708) in view of Selvamanickam et al (2004/0132382A1).

- a. Kinoshita et al (6752708) teaches a method a claimed in claim 27 (col.3, lines 61-67 and see rest of patent.).
- b. Kinoshita et al (6752708) does not teach an outer surface being at least .05 microns thick.
- c. Selvamanickam et al (2004/0132382A1) teaches that a particle size of abrasives or pad thickness of .05 microns is known which allows the polishing pad to be made with that particular thickness.
- d. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Kinoshita et al (6752708) device by providing the teaching to have a thickness of .05 microns as taught by Selvamanickam et al which allows the polishing pad to be made with that particular thickness since it is a known value.

Response to Arguments

3. Applicant's arguments with respect to claim 27 have been considered but are moot in view of the new ground(s) of rejection.

e. There has been new art found to respond to the new claim 27.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art which is being made of record.
